

Removing Users from a Group

Removing users from a group is easy.

First, go to the Groups page found under the Administration tab in the sidebar.

Then click the Manage Group icon on the group you want to remove the user from.

Clicking the icon will popup the Manage Group Modal where you can select the user you want to remove from the group, and then click the trash icon. Doing so will remove the user from the group and remove any assigned roles the user had in the group.
