

_General

Created by Kyle Nehman, last modified by Dennis Underwood on Nov 16, 2023

Cyber Crucible undergoes many stages of internal testing as well as external validation including the Microsoft Windows Hardware Certification Program tests to ensure functionality on all Microsoft Operating Systems as far back as Server 2008 R2.

This can be seen by browsing the Windows Server Catalog, which shows only drivers that have passed WHCP validation. As well as by searching the Microsoft Altitude list, which shows the altitude of all registered drivers.
